We invest only on
behalf of clients.

\$8.5t

entrusted to us by clients,
more than any other firm.

BlackRock doesn't
trade for itself, so
you can be sure that
your best interest is
our only interest.

Feel confident.

Source: BlackRock, as of 6/30/22. iShares is the largest provider of exchange-traded funds based on number of ETFs offered globally and assets under management.

The right team can help you stay on track.

Your financial professional has your financial future in mind and can build a strong foundation for your portfolio by starting with a BlackRock model.

The importance of diversification.

Building a diversified portfolio, across asset classes, is one of the most important components in reaching your financial goals. BlackRock Model Portfolios are invested in a range of funds aiming to help you achieve better returns within your risk level.

BlackRock constructs each model portfolio with quality and cost-efficient investments across alpha, index and factors.

Alpha strategies

Managers delivering active returns, not static tilts.

Index strategies

Low-cost, tax-efficient, broad market exposures.

Factor strategies

Historic drivers of outperformance or reduced risk.

¹ Source: Brinson, Hood and Beebower - Financial Analysts Journal/January-February 1995. Diversification does not assure a profit, nor does it protect against loss of principal. Diversification among investment options and asset classes may help to reduce overall volatility.

BlackRock Models

BlackRock has built a model portfolio menu to help meet your real life goals. Work with your financial professional to invest in a portfolio that aligns with what you want to achieve.

Helping you achieve your goals

Whether you are looking to aggressively grow your portfolio, maximize income or protect your nest egg for you and your loved ones, BlackRock has a model designed to help you achieve your goal.

■ **Build wealth**

■ **Spend wealth**

■ **Make it last**

The way you want to invest*

You can work with your financial advisor to choose a portfolio personalized to your preferences. From environmentally conscious investments to portfolios designed to help protect from market volatility, the choice is yours.

ETFs, mutual funds or a combination of both

Traditional, environmentally sustainable or additional sources of return/risk

BlackRock only funds or a combination of BlackRock and 3rd party managers

Taxable or non-taxable (retirement)

*Not all model portfolios are available at every firm.

Keeping you informed every step of the way

The models are supported with commentaries, performance updates, podcasts and more to help you stay up-to-date on your investments.

Explanations in plain language every time we make a trade

Market views and commentary from model portfolio managers

Materials to show currently model allocations and how the models are performing

Podcasts released every quarter so you can hear directly from BlackRock

Important notes:

This information should not be relied upon as investment advice, research, or a recommendation by BlackRock regarding (i) the funds, (ii) the use or suitability of the model portfolios or (iii) any security in particular. Only an investor and their financial professional know enough about their circumstances to make an investment decision.

Carefully consider the investment objectives, risk factors, charges and expenses of funds within the model portfolios before investing. This and other information can be found in the funds' prospectuses or, if available, the summary prospectuses which may be obtained by visiting each fund company's website or calling their toll-free number. For BlackRock and iShares Funds, please visit www.blackrock.com or www.iShares.com.

Investing involves risk, including possible loss of principal. Asset allocation and diversification may not protect against market risk, loss of principal or volatility of returns.

The BlackRock model portfolios are made available to financial professionals by BlackRock Fund Advisors ("BFA") or BlackRock Investment Management, LLC ("BIM"), which are registered investment advisers, or by BlackRock Investments, LLC ("BRIL"), which is the distributor of the BlackRock and iShares funds within the BlackRock model portfolios. BFA, BIM and BRIL (collectively, "BlackRock") are affiliates.

The BlackRock model portfolios are provided for illustrative and educational purposes only. The BlackRock model portfolios do not constitute research, are not personalized investment advice or an investment recommendation from BlackRock to any client of a third party financial professional and are intended for use only by a third party financial professional, with other information, as a resource to help build a portfolio or as an input in the development of investment advice for its own clients. Such financial professionals are responsible for making their own independent judgment as to how to use the BlackRock model portfolios. BlackRock does not have investment discretion over, or place trade orders for, any portfolios or accounts derived from the BlackRock model portfolios. BlackRock is not responsible for determining the appropriateness or suitability of the BlackRock model portfolios, or any of the securities included therein, for any client of a financial professional. Information concerning the BlackRock model portfolios – including holdings, performance, and other characteristics – may vary materially from any portfolios or accounts derived from the BlackRock model portfolios. There is no guarantee that any investment strategy or model portfolio will be successful or achieve any particular level of results. The BlackRock model portfolios themselves are not funds.

The BlackRock model portfolios include investments in shares of funds. Clients will indirectly bear fund expenses in respect of portfolio assets allocated to funds, in addition to any fees payable associated with any applicable advisory or wrap program. BlackRock intends to allocate all or a significant percentage of the BlackRock model portfolios to funds for which it and/or its affiliates serve as investment manager and/or are compensated for services provided to the funds ("BlackRock Affiliated Funds"). BlackRock has an incentive to (a) select BlackRock Affiliated Funds and (b) select BlackRock Affiliated Funds with higher fees over BlackRock Affiliated Funds with lower fees. The fees that BlackRock and its affiliates receive from investments in the BlackRock Affiliated Funds constitute BlackRock's compensation with respect to the BlackRock model portfolios. This may result in BlackRock model portfolios that achieve a level of performance less favorable to the model portfolios, or reflect higher fees, than otherwise would be the case if BlackRock did not allocate to BlackRock Affiliated Funds.

This material does not constitute any specific legal, tax or accounting advice. Please consult with qualified professionals for this type of advice.

Any information on funds not managed by BlackRock or securities not distributed by BlackRock is provided for illustration only and should not be construed as an offer or solicitation from BlackRock to buy or sell any securities.

This information is intended for use in the United States. This information is not a solicitation for or offering of any investment, product, or service to any person in any jurisdiction or country in which such solicitation or offering would be unlawful.

Content may change without notice and the content originally intended to be provided may no longer be displayed. Privacy and security policies for each third-party website may vary. Please review the policies on each third-party website before use.

Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities.

International investing involves risks, including risks related to foreign currency, limited liquidity, less government regulation and the possibility of substantial volatility due to adverse political, economic or other developments. These risks often are heightened for investments in emerging/developing markets and in concentrations of single countries. Funds that concentrate investments in specific industries, sectors, markets or asset classes may underperform or be more volatile than other industries, sectors, markets or asset classes and the general securities market.

There can be no assurance that performance will be enhanced, or risk will be reduced for funds that seek to provide exposure to certain quantitative investment characteristics ("factors"). Exposure to such investment factors may detract from performance in some market environments, perhaps for extended periods. In such circumstances, a fund may seek to maintain exposure to the targeted investment factors and not adjust to target different factors, which could result in losses.

A fund's environmental, social and governance ("ESG") investment strategy limits the types and number of investment opportunities available to the fund and, as a result, the fund may underperform other funds that do not have an ESG focus. A fund's ESG investment strategy may result in the fund investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. In addition, companies selected by the index provider may not exhibit positive or favorable ESG characteristics.

Actively managed funds do not seek to replicate the performance of a specified index. Actively managed funds may have higher portfolio turnover than index funds.
